

Estelle Cantillon is a professor of economics at the Université Libre de Bruxelles, an associate member at the Toulouse School of Economics, a research fellow at CEPR (London) and an elected member of the Royal Academy of Arts and Sciences of Belgium. Her research lies at the boundary between market design and industrial organization. She has published on auctions, procurement, competition between exchanges, and assignment problems. Her current research focuses on carbon emissions markets, the design of electricity wholesale markets and climate transition policies.

She currently sits on the Board of Regents of the National Bank of Belgium, on the Economics Council of OXERA and is a member of the steering committee of Re-Bel (Rethinking Belgium) and the scientific council of the Brussels Region Institute for Statistics. At ULB, she is the academic director of the Sustainable Development teaching initiative.

Estelle holds a Ph.D. in Economics from Harvard and has held faculty appointments at Yale University, Harvard Business School and the Harvard Kennedy School of Government.
